Please find below and/or attached an Office communication concerning this application or proceeding.

Continuation of Substance of Interview including description of the general nature of what was discussed: the lack of bases on the specification for the membrane composition as now claimed was discussed. Applicant has bases for the composition on the original claims. Amendment to claim 1 to delete the terms adhesive (which is redundant), monomer and polymer from step (II), e.g. to avoid the membrane to read as having the intermedia layer made from the same composition as the final layer, which will produce a membrane with only support and a single layer (formed from the two coating of the same polymer). A Terminal disclaimer has been also requested to avoid an obvious type double patent over 10/620,664 as amended. applicant is in the process of filing a supplemental response including the requested documents and amendment.
